

Male Wrinkle Removing Treatments

Q: Will anyone notice that I have had treatment with Botox?

A: Not directly. The effects of the treatment start gradually over a period of 2 days to weeks. You may have people tell you that you're looking good, or other positive comments, but no one remembers the lines on your face!

Q: Will my face return to normal after the effects of Botox wears off?

A: No, initially it will be better! It will slowly return to its pre-treatment state over a period of months if you don't continue the treatment and go back to your old ways. The lines softened by Botox will gradually return, but as the muscles haven't been repeatedly deepening lines for the past 3 months, the lines will not be as deep as before treatment.

Q: Do many men have Botox treatments?

A: Absolutely! No one looks good with frown lines! Also men tend to get really heavy forehead lines quite young. We have guys of all ages and from all walks of life – from tradies, to guys who work in the mines or on fishing boats, as well as business men. If you haven't tried Botox yet, just do! You'll love the results!
